Group sues after novel Biden deepfake urged voters to skip N.H. primary

By Tobi Raji

Updated March 17, 2024 at 12:08 p.m. EDT | Published March 16, 2024 at 4:49 p.m. EDT

Paul Carpenter describes Al software during an interview in New Orleans in February. Carpenter says he was hired in January to use Al software to imitate President Biden's voice to persuade New Hampshire Democratic voters not to vote in the state's presidential primary. (Matthew Hinton/AP)

Authorities are increasingly concerned at the damaging potential posed by artificial intelligence technology, boonchai wedmakawand/Moment RF/Getty Images

Typical SOC Observations

- Initial Access was the top MITRE Tactic again this month
- This aligns with the top two detected Techniques:
 - T1566 Phishing
 - T1598 Phishing for Information
- While stealer infections continue to be a dominant concern and detection, there was a spike in detections for hacking tools including SharpHound

Dark Web Data Leaks

Executive Monitoring

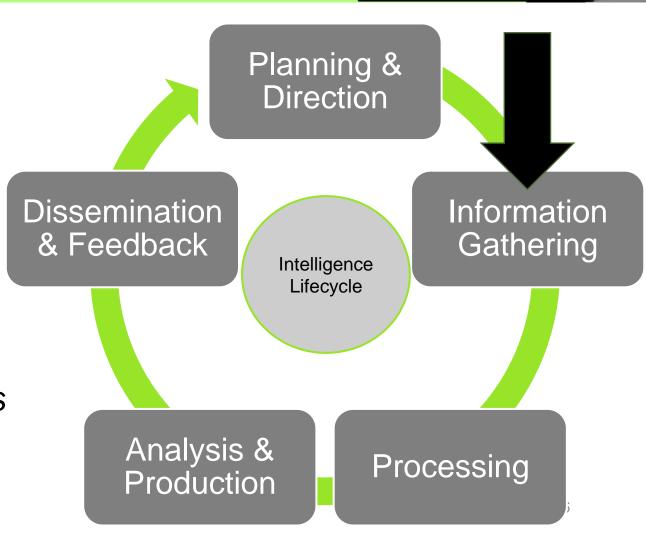

Executive monitoring is a function of risk reduction, for the individual and the organization.

Potential Program Elements

- Cyber-Physical Concerns
- Social Media Monitoring
- Dark Web Monitoring
- Typo Squat Monitoring
- VIP Trainings & Briefings
- Executive Personal Device Protections
- **Goal:** Interrupt your adversaries Intelligence Operations

Getting Started

- Decisions and Planning:
 - Is Executive Monitoring a cyber function only? Physical?
 - Where will the program live?
 - Who will need to be involved?
 - Legal
 - HR
 - Crisis Communications
 - Executives
 - Is an impersonation or issue discovery an event that triggers incident response workflows?
 - What OSINT and defense tools can you start with today?

Weighing Risks

- Tuning Executives into digital ghosts also carries business risk.
- Can you get Executive buy-in for extreme measures? Can you get Executive buy-in for covering their personal devices? Their family members?
- Does going too far interrupt shareholder communications and concerns?

Start Where You Are

- If you have cyber defense tools, put them to use!
 - Recorded Future, SOS Intel, Intel 471, SiloBreaker, etc.
 - Even open-source tools like SpiderFoot, OnionLand, Torch, etc.
- Train users on safe social media practices including restricting their personal and family accounts to private, trusted circles.
- Monitor data broker information that's publicly exposed and consider restricting that information through data broker privacy services.
- If Executives aren't interested in connecting personal and family devices to corporate networks, consider a partner organization to tackle security for their personal devices.
